Data source and methods

Incidence

Country-specific data source: Local* ([See page 3](#))

Method: Estimated from national mortality estimates by modelling, using mortality:incidence ratios derived from country-specific cancer registry data

Mortality

Country-specific data source: National (WHO)

Method: National rates projected to 2020

Prevalence

Computed using sex-, site- and age-specific incidence to 1-;3- and 5-year prevalence ratios from Nordic countries for the period (2006-2015), and scaled using Human Development Index (HDI) ratios.
